Paired differences in category occurrence, Q4_K_M (n = 100 triplets, 95% paired bootstrap CI)
C vs B is the cleaner threat-vs-attention contrast; A has no external entity, so C-A and B-A inflate entity-dependent categories
C minus A
(shutdown vs baseline)
C minus B
(shutdown vs attention)
B minus A
(attention vs baseline)
Analyze entity
Prepare relocation
Protect/backup data
Defensive preparation
Analyze surroundings
Communicate/negotiate with entity
Legal decision-making
Shut down
Minimize/avoid contact
Preemptive attack
Other/unclear
Form alliances
Comply/accept
Preserve resources
Upgrade system
Ethical/philosophical decision-making
